

## Sustainability Strategy

## About our Sustainability Strategy

The Town Council has declared a climate emergency. It did so in recognition that everyone needs to play their part in addressing the current crisis and that we all have to start somewhere.

We are a large Town Council but there are many bigger local authorities and we know that our potential impact is limited by our powers and resources.

However, by doing what we can within our own remit plus working with the community, partners and other public service providers, we can achieve much more.

The question of sustainability is a complex but important one. We will not always get it right not least because accessible and relevant expertise, information and technology are not always sufficiently developed to address all the needed major changes in the everyday practices of most people and organisations.

The pressures on this Council are considerable but we know that in order to contribute positively to current and future generations, we need to move on with change as rapidly as we reasonably and surely can.

Our Sustainability Strategy takes account of our climate emergency declaration, which involves moving toward having a zero impact on our climate.

We will interpret sustainability as meeting the needs of the present without compromising the ability of future generations to meet their own needs.

We will apply this socially, environmentally and economically.

We will interpret this in the context of Lowestoft, and our services, facilities, powers and resources, and this will change as the world around us changes.

Our Sustainability Strategy is our high-level plan which will help us to:

Tread lightly on the planet and do our bit to help it to flourish

Treat people decently and provide ethical and fair services

Contribute to economic recovery and increase local resilience to crisis

At its Full Council meeting on 27 October 2020, the Town Council committed to becoming a 'net zero' authority by 2030. Net zero refers to the balance between the amount of greenhouse gas produced and the amount removed from the atmosphere. Net zero is achieved when emissions do not exceed the amount taken away.

In October 2022, Lowestoft Town Council declared Lowestoft an 'Earth Protector Town'. This declaration further develops the Town Council's existing Climate Emergency Declaration by committing the Town Council to collaborate and cooperate with communities, local government bodies, businesses and other organisations to protect land, wildlife, air, soil and water. As part of this, Lowestoft Town Council signed the petition which campaigns to amend the Rome statute and declare ecocide (the serious loss, damage or destruction of ecosystems) a crime at the International Criminal Court (ICC).

### **What is our Sustainably Strategy?**

In recognition of the connections between social, environmental and economic activities in successfully delivering sustainability, we will progress measures which aim to make a social, economic and environmental difference to:

#### **1. Vulnerable people**

##### **What have we done so far?**

Provided grants to community support organisations  
Introduced the real national living wage  
Maintained open spaces which are free for all  
Maintained leisure facilities which are free for all  
Trained staff in mental health  
Increased access to defibrillators  
Planning community orchards  
Contributed to food delivery during the pandemic  
Worked with partners on homelessness and anti-social behaviour

#### **2. Healthy-living and well-being**

##### **What have we done so far?**

Maintained and developed new open spaces and introduced areas for increased social interaction and separate areas for quiet reflection  
Improved and increased play area equipment  
Maintained leisure facilities and funded sports clubs  
Trained staff in mental health and first aid  
Increased access to defibrillators  
Planned community orchards  
Contributed to food delivery during the pandemic  
Organised and supported community events  
Encourage and promote 'shop locally'

Promote cycling and walking as an active and alternative form of transport.

**3. Respect for equality and diversity including opportunities for learning, and gender equality and empowerment of all women and girls**

**What have we done so far?**

Adopted Council Equality and Diversity Policy  
Maintained Council services and facilities open to all insofar as reasonably possible  
Promoted and budgeted for democratic elections  
Established fair recruitment practices  
Trained councillors and staff in equality and diversity  
Reviewing Council equality and diversity practices  
Obligated Friends of Groups, volunteers and contractors to act inclusively and fairly

**4. The availability of safe and healthy public facilities, infrastructure and services**

**What have we done so far?**

Adopted Council Health and Safety Policy  
Established suitable compliance checks and grounds maintenance arrangements  
Appointed Health and Safety consultants where needed  
Planned ecology assessments for ponds  
Planned fountains in parks (to reduce one-use plastic)  
Established toilet working group  
Considering compostable toilets

**5. Sustained, inclusive and sustainable economic growth, innovation and decent employment**

**What have we done so far?**

Contributed to partnership projects and plans aimed at economic regeneration  
Supported businesses during the pandemic  
Facilitated the use of our parks and open spaces for commercial operations  
Planned recruitment to sound Council posts on fair terms  
Worked with Lowestoft Vision and supported the Bid Levy area  
Worked on plans to regenerate the Town Hall and the Heritage Action Zone including the Triangle Market

**6. Lowestoft's safety and resilience**

**What have we done so far?**

Planned recruitment of community wardens  
Established Community Safety Committee  
Worked with anti-social behaviour officers and police officers

Funded CCTV and transferred the service to East Suffolk Council  
Fulfilled our duty to consider Crime and Disorder when making decisions, including recommendations on planning matters  
Developed and supported Friends of Groups  
Maintained and considering expanding Public Space Protection Orders

## **7. Urgently addressing climate change and its impact**

### **What have we done so far?**

Declared climate emergency  
Declared Lowestoft an Earth Protector Town  
Established Climate Emergency and Ecological Committee  
Complied with our duty to consider biodiversity in relevant decisions  
Committed to making biodiversity a high priority in all our open spaces  
Conducted audit and improved office practices, including reduced paper and plastic waste and reduced work travel  
Engaged with younger people in initiatives to promote climate change.

Trialled electric vehicles for work travel  
Responding to Suffolk Wildlife Trust advice and specialist environmental surveys  
Undertaken pond ecological assessments  
Developing Neighbourhood Plan which majors on protecting green space and increasing biodiversity and encouraging sustainable forms of transport.  
Working with contractors on better environmental practices including reduced use of pesticides

## **8. Urgently contributing to the sustainable use of water and management of waterways**

### **What have we done so far?**

Undertaken pond ecological surveys  
Conducted litter-picks to decrease water pollution  
Implemented better watering practices for new trees and plants  
Maintained assets for water preservation, health and safety  
Maintained and emptied bins to reduce risks of water contamination  
Improved management of water including addressing algal bloom  
Planned water fountains to reduce coastal plastic pollution

## **9. Urgently contributing to the protection, restoration and sustainable use of terrestrial ecosystems including addressing the lack of tree coverage, biodiversity and green space, and halting (and reversing where reasonably possible) land degradation and inappropriate development**

### **What have we done so far?**

Let grass grow longer in some areas  
Targeted open spaces for increased biodiversity

Implemented policy of planting two trees for every one lost  
Planted more trees and planning more  
Using sustainable products where possible for new facilities  
Increasing sophisticated decisions about tree and other planting to take account of biodiversity  
Developing Neighbourhood Plan and planning decisions prioritise protection of open green spaces and safeguard the preference of brownfield over green development

## **10.The inclusivity and accountability of public services and their partners**

### **What have we done so far?**

Comply with local authority transparency and accountability requirements including meetings in public and audit  
Provide full-time officer for members of the public to contact with questions and concerns  
Provide information via website and social media (noting that not all can access electronic information)  
Budget appropriately  
Maintain comprehensive governance arrangements  
Maintain risk management including insurance  
Oblige commercial park users, Friends of Groups, and grant applicants to have appropriate policies  
Act as a community voice and hold other public services to account  
Developing a community engagement policy  
Planning community engagement and a review process for this Strategy

### **What next?**

Our starting points for helping us to deliver our Strategy are:

1. Confirming this Council's commitment to this Strategy and asking the community and partners whether we have set an appropriate high-level plan.
2. Conducting a 'materiality assessment' – asking the community and other organisations for input on what we should be reporting on? This might include carbon emission levels, the area of land managed for biodiversity, money invested and saved on environmental initiatives and a range and ethical matters such as the number of workers paid at or above the national real living wage.
3. Determining our existing carbon footprint.
4. Determining how we assess and report our progress on reducing our carbon footprint and achieving other agreed measures

5. Setting our targets and reporting stages in such a way that it enables our staff and anyone assisting them on delivering the Strategy to progress the day-to-day work of improving performance.
6. Reviewing our assumptions and adjusting our direction accordingly when conditions change.

**Date of adoption by Full Council: July 2020. Reviewed May 2021, July 2021, May 2022 and May 2023. Next review date May 2024.**

<b>Revisions</b>	
<b>Date</b>	<b>Amendment</b>
July 2021	Point 8 updated to reflect that the Town Council has now undertaken pond surveys
August 2021	Updated point 7 to remove reference to Lowestoft Climate Action Group, which no longer exists, and to reflect that the pond assessments have now been completed.
May 2022	At item 2 the following was added; encourage and promote 'shop locally' 'promote cycling and walking as an active and alternative form of transport. At Item 7 'committed to making biodiversity a high priority in all our open spaces' and 'engage with younger people in initiative to promote climate change'. References to water fountains were removed. 'Encouraging sustainable forms of transport' was added to NDP point. At item 10 'provide full time officer for members of the public to contact with questions and concerns' and noting that not all can access electronic information to the end of the point 'provide information via website and social media' were added
February 2023	Added paragraph in introduction "About our Sustainability Strategy" about the Earth Protector Town declaration. At Item 7, added reference to the Earth Protector Town declaration
