

Item 39.1a – Additional information from Sunrise Studios re grant application

Please see below the answers to your questions for more information.

They would like to know how you would intend to make the podcasts available and accessible to users who do not have any of their own equipment to access them on their own, and who may not be able to access them in a public space?

We would be able to offer the podcasts offline by putting them on CDs for people to listen to the podcasts on who do not have access to devices to allow online streaming, and for those who will not be able to play a CD to consume this content on, we are also going to be working with local libraries across the Lowestoft area as outlined in our grant application to enable the playing of podcasts etc.

We will also be able to offer a pair of headphones to anyone who wants to come into our social enterprise café on Bevan Street East to listen to the podcasts.

Also, could you confirm if any contribution from the Town Council would be intended as start-up costs for an ongoing project, or does this project have a fixed end date?

I can confirm the contribution outlined in the grant application from the Town Council would be solely intended for the start-up costs of an ongoing project which will not have a fixed end date.

Look forward to hearing a verdict soon on this grant application.

Kindest Regards,
