

Good morning

I would like to formally apply to be part of the climate committee in Lowestoft. My current job role at East Coast College is that of Commercial Director (Energy Skills Centre) as well as Community lead and STEM lead for schools.

I am passionate about Lowestoft as I have lived here all my life, as well as passionate about the environment and challenges we are facing. I also hold a MSc in Environmental Science which can support my knowledge input into the committee. Through my work I also have good links with the renewable energy sector and sustainability companies.
